RED CROSS WORKING FOR HEALTHIER U. S.

Thousands Aided by Instruction in Care of the Sick, Food Selection and First Aid.

How the American Red Cross guides thousands of persons to health is shown in a summary of the society's activities in the health field based upon the annual report for the last fiscal year. Through its Nursing Service, its Home Hygiene and Care of the Sick courses, nutrition classes, First Aid classes, Life-Saving classes and Health Centers and in numerous other ways it has led to frequent masses of citizens with proper notions of living, the Red Cross carried its message of health into all parts of the country.

The work of the Red Cross during the war in its traditional field of nursing, furnishing the military and naval establishments of the nation with 19,877 nurses, is well known. And there are today 37,787 nurses registered with the American Red Cross and subject to call in emergency. During the fiscal year, 1,551 Red Cross nurses were accepted for assignment to Government service, 283 by the Army and Navy and 1,268 by the United States Public Health Service.

In addition to the nurses enrolled by the Red Cross for Government service, the Red Cross itself employed a total of 1,345 public health nurses in the United States and Europe. By far the greatest number was employed in the United States, 1,257, while 88 were in foreign service.

Home Hygiene and Care of the Sick classes, giving thorough instruction in the proper care of the sick in instances where the illness is not so serious as to require professional nursing care, during the fiscal year numbered 5,170. A statistical picture of the Red Cross operations in this field follows:

New classes formed during year 5,171
Classes completed during year 6,208
New students enrolled 101,928
Students completing course 73,432
What the Red Cross accomplished in giving proper instruction through its Nutrition Service is indicated by the following table:
New classes formed during year 142
Classes completed during year 186
New students enrolled 2,341
Students completing course 2,017

In addition to the above, a total of 22,006 children were given instruction in the proper selection and preparation of foods.

Through its 200 Health Centers, the Red Cross reached 90,252 persons. In these Health Centers, 4,015 health lectures were given and 780 health exhibits held.

In the United States last year, 75,432 persons were killed and 3,500,000 injured in industrial accidents. To prevent this enormous waste the Red Cross held 5,100 first aid classes with a total of 104,000 students enrolled.
